

ISOLMANT FASCIA PERIMETRALE STACCA/ATTACCA

15 cm adhesive bands made of physically reticulated expanded closed-cell polyethylene with peel-and-stick adhesive.

isolmant FasciaPRM

THICKNESS	Approx. 3 mm
FLANKING PATH NOISE REDUCTION	The non-use of Isolmant Fascia Perimetrale causes an acoustic bridge and a consequent decibel loss
INSTALLATION	<ul style="list-style-type: none"> • Use this adhesive side to connect the strips to wall, floor or insulating layer • Trim the extra length only after laying and grouting tile flooring and before installing the skirting boards
SIZE	Strips of 15 cm x 100 m
PACKAGING	10 strips (equal to 1000 m)

→ Conditions of use

Isolmant Fascia Perimetrale avoids flanking noise and vibration transmission from floating screed to the partition wall. It's particularly useful in the presence of thick layers of insulation or in any case of materials that do not allow an easy wall fold. It can substitute the elastic material used for expansion joints.

→ Item specifications

Adhesive strip for the perimeter acoustic insulation made of expanded closed-cell cross-linked polyethylene with approx. 30 density kg/m³. Height 15 cm. It is provided in packs of 10 elements of 100 m each. Thickness approx. 3 mm.
